INTUITIVE OPERATION

TOUCHSCREEN DISPLAY

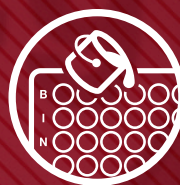

A fully adjustable 17" LCD touchscreen monitor moves up and down, tilts, and rotates. It also incorporates a touch screen that works seamlessly with the mouse.

USB KEYBOARD & MOUSE

Depending on preference, operators can use a USB keyboard and mouse as an alternative to the touchscreen, or use all three input methods interchangeably.

COLOR-CODED BALL TRAY

The ball tray assembly features an innovative design with color-coded number rows to match bingo balls, making game calling easier than ever.

SWITCH PANEL

An easily accessible switch panel controls power to the light in the blower chamber, the mixer motor, and the main blower chamber motor.

CONTROL KNOBS

The two knobs on the operator's side of the console feature dual functionality (push & pull) to control the ball tray and blower chamber.

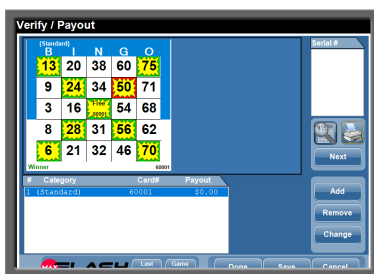

PC-BASED SOFTWARE FEATURES

The Statesman Premier II's intelligent, user-friendly software features quick reference pop-up screens, easy-to-follow menus, and expanded programming capabilities – all with detailed and vivid color graphics.

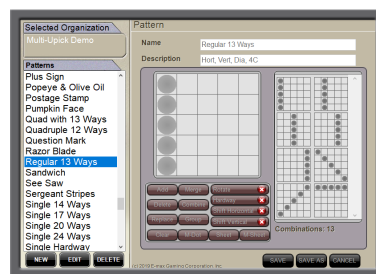

GAMEPLAY SCREEN

The live game screen displays all important game information, including the game pattern, a flashboard display, and a live ball picture-in-picture screen.

VERIFICATION SCREEN

After entering a free space #, the Statesman Premier II's intelligent software will display **Winner** or **Not a Winner** with the last ball number flashing.

GAME PATTERN SCREEN

Operators can choose from one of the several pre-built game patterns, or design a custom game pattern for the specific needs of their game.

CUSTOM OPERATING SYSTEM

The Statesman Premier II features a Microsoft® Windows® operating system with a customized gaming application shell developed by Arrow International.

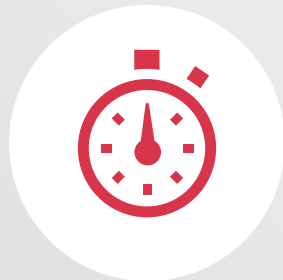

SOLID-STATE MEMORY

Unlike other PC-based bingo consoles, the Statesman Premier II features a solid-state drive (SSD) in lieu of a traditional hard drive, resulting in a reliable, faster and more powerful system.

MULTI-FACE VERIFICATION

The built-in verification system is specifically designed to support and verify all Arrow International bingo paper, including specialty papers, UniMax®, Capitol® and Tear-Opens®.

INTERMISSION & BALL TIMER

The Statesman Premier II's built-in timer counts down the number of seconds between ball calls for each game, with intervals that can be adjusted by the game operator.

SUPERIOR TECHNOLOGY

HI-RES CAMERA

A high resolution digital camera mounted to the movable ball holding mechanism transmits the live ball image to the ball monitors driven by the console.

HD VIDEO OUTPUT

Using a sophisticated data router and video converter, the Statesman Premier II supports composite HD video output for player monitors & flashboards.

ADVERTISING

With advanced multimedia capabilities, operators can create custom text and/or graphical advertisements to increase their sales.

With the advanced technology used by the **Statesman Premier II** bingo console, operators can take their bingo sessions to the next level.

A hi-res camera paired with HD video output and cutting-edge multimedia capabilities provides a unique experience for both operators & players.

REPORT PRINTER

An optional Ethernet report printer can be used by operators to print detailed gaming schedules, payout reports, and/or error logs.

EXTERNAL USB HUB

In addition to accommodating a USB keyboard & mouse, the USB hub can be used with a flash drive for saving reports, software upgrades & backups.

INTERNAL LIGHTING

Well lit ball chute and electronics display. Enhances the experience for all bingo games and venues while illuminating the balls in action.

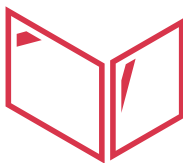

FUNCTIONAL DESIGN

ERGONOMIC CABINET DESIGN

The modern, ergonomic cabinet is designed for optimal operator comfort and efficiency. Aluminum extrusions on the console's exterior provide increased structural support.

LARGE WRAP-AROUND WINDOW

The Statesman Premier II's illuminated ball chamber features a large, wrap-around acrylic window, providing players with a view of the balls from two different sides.

QUIET OPERATION

With an insulated ball chamber, improved soundproofing, and a special anti-static foam mat that helps to cushion bingo balls, the Statesman Premier II provides soft, quiet gameplay operation.

INNOVATIVE BALL TRAY ASSEMBLY

In addition to a new color-coded design, the ball tray assembly features individually sealed, non-mechanical switches with rubber caps, and a separate chamber to protect against liquid spills.

ADVANCED ELECTRONICS

INTERNAL UPS

The uninterruptible power supply protects the console's hardware against power surges, and will operate from the battery backup in the event of a power outage.

BACKUP BATTERY

In the event of a power outage, a battery pack will supply temporary power to backup operations in order to save and/or print any reports.

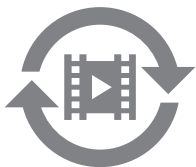

DATA ROUTER

The DR III scans the ball matrix and communicates with the Gaming Computer to incorporate composite video output for monitors and flashboards.

The highly sophisticated **Statesman Premier II** bingo console is technologically advanced, featuring state-of-the-art electronic components.

Inside the locking cabinet, internal lighting and a sliding tray assembly provide access to the console's electronics compartment for easy maintenance.

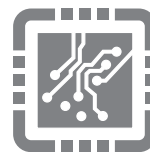

VIDEO CONVERTER

Digital video output from the Gaming Computer is converted into composite video for the Data Router, and optional digital video for the front mounted TV.

GAMING COMPUTER

An industrial grade, low power, fanless computer with two video channels supports the console monitor as well as the player monitors.

CABLE ADAPTER

A small PCB adapts 15 cables into 1. The Data Router scans the ball tray switch matrix and reports any switch depressions to the Gaming Computer.
